

M. LANDMAN
COMMUNICATIONS
& CONSULTING

SUSTAINABILITY SERVICES

M. Landman Communications & Consulting provides practical and professional guidance on green living, green operations, green building, and other sustainability strategies. Miriam Landman is an environmental advisor, writer, editor, educator, and speaker who has been involved in environmental endeavors for more than two decades. She helps groups and individuals incorporate sustainable, healthy, and efficient practices into their daily activities and operations. She has also facilitated the use of sustainable practices in the planning, renovation/remodeling, operation, and maintenance of homes, buildings, and developments.

Miriam's services include consultations, presentations, and the development of written materials and online resources. She has worked on projects of all sizes, and she works with a variety of clients, including:

- Organizations, companies, institutions, and government agencies
- Homeowners and renters
- Website publishers
- Product manufacturers and retailers
- Building owners, land owners
- Building professionals (e.g., developers, architects, interior designers, contractors)

Writing and Editing Services

- Research and writing to develop publications or informational resources (print and/or online), such as resource directories, blog or social media content, webpages, case studies, materials selection checklists, product listings, interactive maps, presentations, fact sheets, reports, manuals, and articles on various environmental issues, solutions, practices, programs, policies, products, projects, or services.
- Editing, proofreading, or technical review of written content (print and/or online), including marketing/promotional materials.

Education and Training Services

- Presenting seminars, workshops, and lectures on sustainability topics for professionals, students, and/or the general public.

Project Consulting Services

- Providing consultations (by email, by phone, or in person) on **green living and green household practices** or **green operations and maintenance practices for homes or businesses** (offices and facilities).

Project Consulting Services [continued]

- Providing consultations on **green planning, materials, renovation, remodeling, operations, and/or maintenance strategies for single-family homes or for mixed-use, commercial, or multi-family buildings, developments, and communities**; and providing follow-up information, such as:
 - Existing resources (e.g., green guidelines, rating systems, certifications and standards, checklists, policies, programs, product directories, project case studies, websites, or articles) that are relevant to each client's particular interests and needs.
 - Information on environmentally preferable materials and product options, and local product suppliers.
 - Research on specific green strategies, materials, technologies, or systems in response to questions from the client.
 - Project-specific goals or guidelines for green design, construction, or renovation; and/or customized green materials specification checklists.
 - Referrals to green architects, builders, engineers, solar contractors, and other green building professionals or specialists in the project region, to help you build a highly qualified team for your project.

Note: Miriam is not an architect nor a designer, so she does not provide technical design, drafting, or drawing review services. Also, while Miriam can answer general questions about LEED, she no longer provides comprehensive LEED consulting services.
